

SOUTH CAROLINA SOURCE WATER PROTECTION

GRANT

develop a watershed-based plan
for best management practice
implementation and drinking water
source protection

Watershed-based plans (WBP) identify pollutants in a watershed, determine the source of pollutants, and describe what needs to be done to address each source. Once a watershed-based plan is in place, it becomes the guidance and framework for any water quality improvement activities in that watershed.

Basic Eligibility Requirements:

- Cover a watershed with a **drinking water intake** or **surface source water**
- Cover **one to four** 12-digit HUCs
- Address surface water **pollutants** that **impact source water for drinking water** systems

PLAN TO PROTECT & RESTORE YOUR WATERSHED

Let us fund your plan development

BEFORE

AFTER

Watershed-based plans include:

- EPA's **nine elements**
- **stakeholder** participation
- assessment of specific **causes of impairments** and sources of water quality problems
- identification of **measurable water quality goals**
- **implementation** of specific actions needed to solve those problems—point and nonpoint

Visit our [webpage](#) for more information about the WBP program.
